DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of the invention of Group I in the reply filed on July 31, 2006 is acknowledged.

Claims 7-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Objections

Claim 1 is objected to because of the following informalities: the recitation of "pins" in line 3 should read -- fins --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Scott. It has been held that the term "integral" is sufficiently broad to embrace constructions united by such means as fastening and welding. *In re Hotte*, 177 USPQ 326, 328 (CCPA 1973). In this respect, Scott (page 2, lines 8-16) discloses the heat exchanger is sweated (i.e. soldered) in the final assembly. Regarding claims 2 and 6, Scott (page 1, lines 62-71) discloses support holders 12, 13 with slots 16.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Kadle. It has been held that the term "integral" is sufficiently broad to embrace constructions united by such

means as fastening and welding. *In re Hotte*, 177 USPQ 326, 328 (CCPA 1973). In this respect, Kadle (column 2, lines 30-32) discloses the fins 14 are brazed to the tubes 10. Regarding claim 2, Kadle discloses support holders 12. Regarding claim 3, Kadle (column 2, lines 13-30) discloses the fins 14 and tubes 10 are composed of aluminum.

Claims 1, 3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al. It has been held that the term "integral" is sufficiently broad to embrace constructions united by such means as fastening and welding. *In re Hotte*, 177 USPQ 326, 328 (CCPA 1973). In this respect, Hoshino et al (column 5, lines 22-26) discloses the fins 12 are brazed to the tubes 11. Regarding claim 3, Hoshino et al (column 1, lines 12-15) discloses the heat exchanger, i.e. condenser is composed of aluminum, including fins, tubes and headers. Regarding claim 5, Hoshino et al discloses fins 12 have louvers 12a, which by definition are slits angled from the plane of the fin.
